Summary

I am a B.Tech Computer Science & Engineering student (Batch 2023–2027) with a keen interest in Full Stack Java Development. I have a strong foundation in Core Java, OOP concepts, Data Structures & Algorithms, and I am building my skills in Spring Boot, Hibernate, SQL, HTML, CSS, and JavaScript frameworks.

I am passionate about solving real-world problems through technology and creating scalable, user-friendly applications. Alongside academics, I am working on projects to strengthen my hands-on experience in both backend and frontend development.

Work Experience.

Teaching (Part-Time)

In Coaching Centre (At Maa Kalawati Inter College , Jaunpur) Sept 2023 – July 2025

- Delivered part-time academic instruction to students of Classes 6–10 in a coaching environment
- Developed and implemented structured lesson plans to strengthen conceptual understanding
- Conducted regular doubt-clearing and revision sessions to support individual learning needs
- Evaluated student performance through assignments and class assessments, providing feedback for improvement

Intern (KTR Soft Tech)

Fronted Development Internship (Remote) Dec 2025 – Current

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript, following modern UI/UX principles.
- Built dynamic web pages and components, ensuring cross-browser compatibility and mobile responsiveness.
- Worked on real-world client-focused projects, translating requirements into functional frontend solutions.
